# CONVEYOR WASHER WITH AUTOMATIC PALLET DISPENSER AND STACKER

## MODEL # MB-D 48X12-S-4W-FWR-SS

### Scope

Customer .....	Pharmaceutical and general industries
Workpiece.....	Plastic pallets of 48" × 42" and 48" × 48"
Application.....	Remove manufacturing fluids and accumulated dirt from transportation
Production .....	Up to 60 pallets per hour
Stacker capacity.....	Stacks pallets up to 84" high Between 8 and 16 pallets or 1200 lbs Capable of queuing 3 stacks of pallets
Cleanliness.....	Required to meet pharmaceutical industry standards
Dryness .....	Required to meet pharmaceutical industry standards

### Features

### Benefits

Stainless-steel construction .....	Ensures cleanliness required for pharmaceutical industry standards
Automatic pallet dispenser and stacker .....	Provides fast, precise pallet loading and unloading for increased production and efficiency
Pallet loading at 90 degrees to workflow .....	Reduces required operational floor space
7-day timer .....	Programs the tank pump-up for water removal during off-shift and automatically refills the machine with fresh water Prevents the occurrence of stand still water
Marine type tank access doors.....	Ease of tank maintenance
V-Jet spray nozzles mounted on elbows.....	Allows nozzle adjustment for flexible cleaning
Programmable logic controller with color touch-screen interface .....	Easy programming of different cleaning processes and system diagnostics are readily displayed to operator
Steam heating instead of electric heating.....	Reduces energy consumption costs
